Of Interest to Managers of Plantations.

A Model Plant is not complete without Electric Power, thus dispensing with

small Engines. Why not generate your power from one CENTRAL Station? One generator can furnish power to your Pumps, Centrifugals, Elevators, Plows, Railways and Hoists; also furnish light and power for

a radius of from 15 to 20 miles. Electric Power being used saves the labor of hauling coal in your field, also water, and does away with hing priced engineers, and only have one engine to look after in your mill.

Where water power is available, it costs nothing to generate Electric Power.
THE HAWAHAN ELECTRIC COMPANY is now ready to furnish Electric Plants and Generators of all descriptions at short notice, and also has on hand a large stock of Wire, Chandeliers, and all

Electrical Goods. All orders will be given prompt attention, and estimates furnished for Lighting and Power Plants; also attention is given to House and Marine Wiring. THEO. HOFFMANN,
